The proportion of coin, bullion, and notes to total liabilities is at present 20·3 per cent.

Land Selections.—In the nine months ended 31st March, 1922, there were 1,573 applications for 960,200 acres for original holdings under the Crown Lands Acts; and 739,827 acres, representing 2,090 blocks, were set apart for original holdings, which include areas for returned soldiers. During the quarter ended 31st March, 1922, the number of applications was 402, and the area applied for 283,775 acres. The lands set apart for original holdings in the quarter ended 31st March, 1922, were 240,659 acres, representing 705 blocks.

Retail Prices, Sydney.—From the information collected as to average retail prices of food in Sydney, it appears that in March, 1922, the prices of meat were 17 per cent. higher than in July, 1914; other food and groceries were 56 per cent. higher; and the prices for the two combined were 46 per cent. higher.

Prices of meat were $1\frac{1}{2}$ per cent. lower than in February; other food and groceries, $\frac{1}{2}$ per cent. higher; and the two combined showed a scarcely perceptible decrease.

Compared with the corresponding month (March) of 1921, meat was 28 per cent. cheaper; other food and groceries were $13\frac{1}{2}$ per cent. cheaper; and the two combined were 17 per cent. cheaper.

The commodities for which the price levels are computed are those in every-day consumption.

Wholesale Prices.—During the March quarter, 1922, the general level of wholesale prices dropped by 2 per cent., and is now 36 per cent. lower than the highest point reached in July, 1920.

In January there was an increase of 6 per cent. in the index number of agricultural produce, and a 25 per cent. increase in the index number of meat.

The increase in agricultural produce was due to a substantial increase in the price of wheat and flour.

The price of meat fell considerably during February and March when it was back to the low prices prevailing at the end of 1921. All other groups showed a slight decrease during the quarter.

Of the 100 commodities used in forming the index numbers, 47 commodities remained unchanged during the quarter, 14 increased, and 39 became cheaper.

New Buildings.—Metropolis.—According to returns supplied by the several Town Clerks, the number of new buildings erected in the Metropolis during the three months ended 31st March, 1922, numbered 1,722 as compared with 1,220 during the March quarter, 1921.

Country Municipalities.—Table No. 57 shows that during March quarter, 1922, permission was granted in country Municipalities to erect 991 new buildings of the value of £737,318, as compared with 605, of a value of £370,136 in the corresponding period of 1921.

Meteorology.—March quarter, 1922.—The chief feature of the weather early in January was the cyclonic storm, accompanied by heavy rain, which swept southward along the coastal areas. There was light to heavy rain over the whole State, but the monthly total was below the average. In February there were torrential downpours on the central and north coasts and the rain extended to the tablelands, where, however, the fall was mostly light. The total rainfall for the month was above the average in most of the coastal areas, normal along the tablelands, but generally below the average in the slopes and Western Division. Very little rain fell over New South Wales during March and no rain was reported in the Western Division, Riverina, or on the Central Western Plains.

Vital Statistics—March Quarter, 1922.—*New South Wales.*—The births registered in March quarter numbered 13,672, equivalent to an annual rate of 25·69 per 1,000 of population; and the deaths, 4,505, which is equivalent to 8·46 per 1,000 of population. The annual rate per 1,000 population of the 4,399 marriages registered was 8·27. Compared with the average of the March quarter of the preceding five years, the death-rate was 19 per cent. and the birth-rate 1 per cent. lower, while the marriage-rate was 2 per cent. higher.

Sydney and Suburbs.—The births registered in March quarter numbered 5,437 equivalent to a rate of 23·48 per 1,000 of population per annum; of the total, 2,738 were males and 2,699 females. The rate is 1 per cent. below the average of March quarter of the previous five years.

The deaths in March quarter numbered 1,968, namely, 1,055 males and 913 females. The mortality rate of 8·50 per 1,000 of population per annum is 5 per cent. below the quinquennial rate for the March quarter. The deaths were below the average in all age-groups except 65 and over.

The infantile mortality (deaths under 1 year) was 53·9 per 1,000 births, and is 23 per cent. below the average for the March quarter of the previous five years.

Labour Conditions in March Quarter, 1922.—The following particulars in regard to Employment and Dislocations have been taken from reports of the Department of Labour and Industry:—

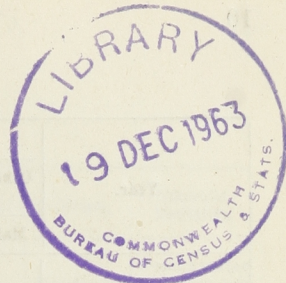

Employment.—The Director of the State Labour Exchanges reports that at the end of March there were about 6,000 persons out of work in the metropolitan district and about 7,000 in the country districts. The persons affected by unemployment included workers in the engineering and iron trades, also labourers, salesmen and clerks; there was a scarcity of women workers.

During the March quarter, 5,754 positions for men and 3,276 for women were made available by employers through the agency of the State Labour Exchanges, and 5,505 men and 2,033 women were placed in positions; in December quarter, 9,218 positions were made available, and 8,101 persons were placed in positions.

Dislocations.—During the March quarter 25,996 employees were involved in industrial dislocations owing to disputes, and the total loss amounted to 106,104 working days. The dislocations were more serious than in the previous quarter, when 25,426 employees were involved, with the loss of 90,135 days.

Increases in Wages.—The principal increases in wages during March quarter were as follows:—Plasterers, 3½d. per hour; bricklayers (48 hours) 1½d. (44 hours), 9½d. per hour; slaters and tilers, 1½d. per hour.

In a number of cases the weekly and hourly wage rates have been reduced in accordance with the Board of Trade declarations of 8th October, 1921, and 22nd December, 1921.

No. 62.—Wheat Harvest, 1921-22.

In January last a preliminary statement was issued in which it was estimated that the yield of grain would be 15,093,000 bags, equivalent to 45,285,000 bushels, or 14·3 bushels per acre. This estimate was not realised, the actual returns falling short by 2,635,000 bushels, or 5·8 per cent.

The area harvested for grain was 3,202,610 acres, including 65,600 acres which failed entirely. The grain harvested amounted to 14,216,660 bags, equivalent to 42,650,000 bushels, or 13·3 bushels per acre.

The highest yield per acre was in the Riverina, 14·4 bushels per acre; and the lowest, 6·9 bushels per acre, in the Western Division.

The area cut for hay was 468,930 acres, including 5,780 acres which failed and 17,570 acres fed-off, making a total of 3,689,110 acres sown with wheat. The production of hay was 579,800 tons, or 1·24 tons per acre.

The following table shows the actual results of the wheat harvest in 1921-22 in the principal divisions of the State:—
